# 01 University Profile

Chang'an University, or CHD, is a national key university. Directly under the leadership of the Ministry of Education, it is listed under Project 211, Project 985 Innovation Platform, and Double First-Class Project of China. Located in Xi'an City, Shaanxi Province, CHD has two campuses and three training bases, with a total area of 250 hectares.

CHD was originally known as Xi'an Highway University, which was built in 1951. Merged with Xi'an Engineering Institute and Northwest Institute of Construction Engineering, it was later renamed as Chang'an University in 2000. Since 2005, CHD has been successively financed and supported by the Ministry of Education, Ministry of Transport, Shaanxi Provincial People's Government, Ministry of Natural Resources, and Ministry of Housing and Urban-Rural Development.

CHD has 25 schools and departments that cover the entire process of bachelor's, master's, and doctoral education and cultivation in 7 major fields, namely, engineering, science, management, economics, philosophy, law and literature. In the new era, facing major national strategies, a number of physical research institutes have been established, such as Modern Transportation Research Institute, Qinling Ecological Environment Research Institute, Yellow River Research Institute, Sichuan-Tibet Railway Engineering Research Institute, Hangzhou Future Transportation Research Institute, and Xiong'an Modern Industry Research Institute. At present, there are 4 academicians, from the Chinese Academy of Sciences, Chinese Academy of Engineering, and Singapore Academy of Engineering, and more than 1,400 professors and associate professors, including 392 doctoral supervisors and 1,151 graduate supervisors. We have over a hundred outstanding talents who undertake national key research and development plans and major engineering projects. There are currently over 25,000 full-time undergraduate students, over 12,000 doctoral and master's students, and over 1,700 international students.

CHD currently has 9 doctoral programs and 32 master's programs. There are 9 postdoctoral research centers. Six disciplines, including engineering, earth sciences, materials science, environmental science and ecology, social sciences, and chemistry, have entered the top 1% of ESI globally. There are currently 86 undergraduate majors, of which 50 have been selected as first-class construction majors in the national "Double Ten Thousand Plan", and 27 have passed the national engineering education certification. The university is firmly ranked among the top 100 universities in China, and the disciplines of civil engineering and transportation are ranked 20th among U.S. News global universities. It is known for cultivating highway transportation talents and the "golden card" for technological innovation.

CHD has achieved fruitful results in education, and has sent over 320,000 outstanding graduates both domestically and internationally, including over 10,000 international students. Outstanding alumni are all over the world. A group of "chief engineers" have emerged, represented by Su Quanke, chief engineer of the Hong Kong-Zhuhai-Macao Bridge Authority, who undertakes major engineering construction, and a group of "scientists", represented by Ding Han, an academician of the CAS Member, who leads the academic frontier, represented by Feng Zhenglin, the director of the Civil Aviation Administration of China, the "political elites" and the "business elites" who have created a group of listed companies. CHD has been selected as the "National Innovation and Entrepreneurship Base for Practical Education in Higher Education

Institutions" and "National Universities with Typical Experience in Innovation and Entrepreneurship Education Reform for College Students".

CHD research platform is well-equipped, with 5 national-level experimental teaching centers, 19 provincial-level experimental teaching demonstration centers, 2 national engineering laboratories, 1 international joint laboratory, 1 national applied mathematics center, and 91 provincial-level key research bases. The only "Connected and Automated Vehicle Test Field" for domestic universities has been recognized by the Ministry of Transport as one of the three "Autonomous Driving Closed Field Testing Bases" in China.

CHD is committed to original innovation and builds a four-in-one scientific and technological innovation system of "big team, big platform, big project, and big achievement". The annual scientific research funding has exceeded 960 million yuan, and the annual National Natural Science Foundation and National Social Science Foundation have exceeded 110 projects. In recent years, it has won 23 first and second prizes of the National Science and Technology Progress Award and over 1,300 annual authorized patents. We have successively overcome a complete set of scientific and technological difficulties in highway construction in special areas, developed a warning system for loess landslides and large-scale collapses, and solved the risk prevention and control problems of ground fissures in subway construction. In the new era, we actively layout interdisciplinary strategies such as "smart+", "green+", and "big data+", aiming to transform and upgrade industries in the future.

CHD pays attention to the promotion of achievements, and scientific research achievements are applied to the construction of super projects such as the Hong Kong-Zhuhai-Macao Bridge, which is known as the "national treasure", and the Beijing Daxing International Airport, which is a new benchmark for global airports. It supports the construction of many century projects with significant international influence such as the world's largest cable-stayed bridge for both highway and railway, the Hutong Yangtze River Bridge, the world's highest altitude Qinghai-Tibet Highway, the longest highway tunnel in Asia, the Qinling Zhongnanshan Tunnel, the first desert expressway, and the Yujing Expressway. We have established deep strategic cooperation relationships with dozens of Fortune 500 companies. CHD adheres to excellent leadership and meticulously builds a group of world-class academic journals. The eight academic journals edited and published by the university have firmly established themselves at the forefront of academic publishing in Chinese universities.

CHD has established Sino-foreign cooperative educational institutions such as the "Chang'an Dublin International College of Transportation", the Chinese Language Center of the Maldives Villa College (Confucius Institute), the International Cooperation Joint Laboratory for Sustainable Development of Highway Transportation Infrastructure in Special Regions, the Joint Bachelor Program of Artificial Intelligence between Chang'an University and École Pour l'Informatique et les Techniques Avancées France, and five "111 Plan" subject innovation and talent introduction bases. We collaborate with large enterprises such as China Road and Bridge Corporation, China Communications Corporation, China Railway Corporation, and China Railway Construction Corporation to promote the "Going Global" partnership plan for Chinese enterprises.

## 02 History

In 1951, when People's Republic of China was founded, everything was needed to be done. A group of pioneers of New China established the Northwest Transportation Cadre College on a wasteland on the outskirts of Lanzhou, laying the first cornerstone of Chang'an University. In 1953, the Xi'an Geological School, financially supported by the Ministry of Geology of the Central People's Government, and the Xi'an Construction Engineering School, financially supported by the Northwest Construction Engineering Bureau, were established successively.

On April 18, 1951, the Northwest Transportation Cadre College was established in Lanzhou.

The First Opening Ceremony of Xi'an Highway University

Group Photo of Graduates of Xi'an Geological School

In October 1995, Xi'an Highway University successfully passed the preliminary examination of the national "211 Project" department, and was listed as one of the 100 key national universities.

On April 18, 2000, Chang'an University was formed by the merger of Xi'an Highway University, Xi'an Engineering Institute and Northwest Institute of Construction Engineering. Selected as one of the country's first batch of "Project 211" key universities, the university is directly under the leadership of the Ministry of Education, which begins a new era of university development and construction. In 2017, the university entered the ranks of national "Double First-Class" universities, taking solid steps towards building a distinctive and internationally renowned research-oriented university.

On April 18, 2000, Chang'an University was established.

On June 26, 2005, the signing ceremony for the joint construction of CHD by the Ministry of Education and the Ministry of Transport at the Great Hall of the People was held.

In September 2017, CHD passed the examination of the first round "Double First-Class" construction.

On April 18, 2021, the 70th anniversary celebration conference was held.

## 03 Faculty

Chang'an University vigorously implements the strategy of strengthening the university with talents, providing a solid guarantee for the discipline construction and the sustainable development of the university. The university has a group of high-level teaching team, scientific research team, and national, provincial and ministerial-level personnel. There have emerged several teaching and education models.

### ACADEMICIANS

**Tang Zhongli\***  
Academician of the Chinese Academy of Engineering

**Li Peicheng\***  
Academician of the Chinese Academy of Engineering

**Peng Jianbing\***  
Academician of the Chinese Academy of Sciences

**FWA Tien Fang\***  
Academician of the Singapore Academy of Engineering

**Chen Xiaofei**  
Academician of the Chinese Academy of Sciences

**Cui Peng**  
Academician of the Chinese Academy of Sciences

**Mao Jingwen**  
Academician of the Chinese Academy of Engineering

**Wang Hao**  
Academician of the Chinese Academy of Engineering

**Gushal Sramu**  
Academician of the Chinese Academy of Engineering

**Yang Yuanxi**  
Academician of the Chinese Academy of Sciences

**Zhao Chunjiang**  
Academician of the Chinese Academy of Engineering

**Zhou Xuhong**  
Academician of the Chinese Academy of Engineering

• Full-time Academicians*	4
• Professors and Associate Professors	1,400+
• Doctoral Supervisors	390+
• Graduate Supervisors	1,150+

## 04 Teaching and Education

Since the year of 2016, Chang'an University has undertaken more than 450 educational and teaching research projects including national planning projects, and won 36 national and provincial teaching achievement awards. Students have won more than 2,000 awards in various national discipline competitions and more than 4,000 awards at or above provincial level.

Academician Tang Zhongli gave a lecture for graduate students.

Academician Li Peicheng guided the students' field trip.

Academician Peng Jianbing made the field investigation in the Fen Wei Basin.

Professor FWA taught undergraduates.

A professor guided students to make chemical experiments.

Students were on an internship at the Hong Kong-Zhuhai-Macao Bridge.

## 05 Schools and Departments

### SCHOOLS AND DEPARTMENTS

- ⊙ School of Earth Science and Resources
- ⊙ School of Civil Engineering
- ⊙ School of Water and Environment
- ⊙ School of Architecture
- ⊙ School of Materials Science and Engineering
- ⊙ College of Transportation Engineering
- ⊙ College of Land Engineering
- ⊙ School of Energy and Electrical Engineering
- ⊙ School of Marxism
- ⊙ School of Humanities
- ⊙ School of Sciences
- ⊙ School of Foreign Studies
- ⊙ International Education School/International Student Office
- ⊙ Department of Physical Education
- ⊙ School of Continuing Education
- ⊙ Chang'an Dublin International College of Transportation at Chang'an University
- ⊙ College of Future Transportation
- ⊙ Art Education Center
- ⊙ School of Highway
- ⊙ School of Automobile
- ⊙ School of Construction Machinery
- ⊙ School of Economics and Management
- ⊙ School of Electronics and Control Engineering
- ⊙ School of Information Engineering
- ⊙ School of Geological Engineering and Geomatics

			Materials Shaping and Control Engineering	
			New Energy Materials and Devices	
13	College of Transportation Engineering	Transportation Engineering	Transportation Engineering	
		Communications and Transportation	Communications and Transportation	
		Big Data Management and Application	Big Data Management and Application	

## 07 Scientific Research

In recent years, Chang'an University has undertaken over 10,000 scientific research projects, including the National "973" and "863" Plans, national key research and development plans, major and key projects of the National Natural Science Foundation of China, National Social Science Found Projects, western China transportation construction technology projects, and land resource survey projects. It has received 22 national science and technology awards including the first prize of the National Science and Technology Progress Award, and over 300 provincial and ministerial level awards. It edits and publishes 8 academic journals, of which 3 are selected in the "Excellent Action Plan for Chinese Science and Technology Journals".

No.	Schools	Disciplines	Majors
14	College of Land Engineering	Land Consolidation Engineering	Land Consolidation Engineering
		Land Resource Management	Land Resource Management
15	School of Energy and Electrical Engineering	New Energy Science and Engineering	New Energy Science and Engineering
		Energy and Power Engineering	Energy and Power Engineering
		Electrical Engineering and Automation	Electrical Engineering and Automation
16	School of Marxism	Ideological and Political Education	Ideological and Political Education
17	School of Humanities	Law	Law
		Public Management	Public Administration
			Public Service Administration
		Drama and Film Studies	Drama and Television Literature
			Radio and Television Directing
		Journalism & Communication	Journalism
			Advertising
Chinese Language and Literature			
18	School of Sciences	Engineering Mechanics	Engineering Mechanics
		Mathematics	Mathematics and Applied Mathematics
	Information and Computing Science		
19	School of Foreign Studies	English	English
		Japanese	Japanese
20	Department of Physical Education	Social Sports Instruction and Administration	Social Sports Instruction and Administration
21	Chang'an Dublin International College of Transportation at Chang'an University	Road, Bridge and River-crossing Engineering (Sino-foreign cooperation)	Road, Bridge and River-crossing Engineering (Sino-foreign cooperation)
		Vehicle Engineering (Sino-foreign cooperation)	Vehicle Engineering (Sino-foreign cooperation)
		Communications and Transportation (Sino-foreign cooperation)	Communications and Transportation (Sino-foreign cooperation)

# 08 Research Platform

## National Engineering Laboratories

---

- ※ National Engineering Laboratory of Security Technology of Bridge Structure
- ※ National Engineering Laboratory of Road Maintenance Technology and Equipment

## Key Laboratories of Ministry of Education and Engineering Research Centers

---

- ※ Key Laboratory of Special Region Highway Projects (Ministry of Education)
- ※ Key Laboratory of Road Construction Technology and Equipment (Ministry of Education)
- ※ Key Laboratory of Western Geological Resources and Geoengineering (Ministry of Education)
- ※ Engineering Research Center of the Equipment and Technology of Highway Construction and Conservation
- ※ Engineering Research Center of the Safety of Highway Large Structures
- ※ Engineering Research Center of Highway Auxiliary Surface Material
- ※ Key Laboratory of Arid Region Geohydrology and Its Ecological Effect (Ministry of Education)
- ※ Vehicle Networking Ministry of Education-China Mobile Joint Laboratory
- ※ Engineering Research Center of Ministry of Education for Road Infrastructure Digitization
- ※ Joint Laboratory for International Cooperation on Sustainable Development of Road Transportation Infrastructure in Special Areas
- ※ Research Station for Multi-scale and Multi-variable Science in the Arid Zone Earth Critical Zone, Ministry of Education
- ※ Research Station for Water Cycle and Geological Environment of Loess Plateau, Ministry of Education

## Key Laboratories of Ministry of Communications

---

- ※ Key Laboratory of Highway Structure and Materials
- ※ Key Laboratory of the Security Technology of Motor Transport
- ※ Key Laboratory of the Examination and Reinforcement Technology of Old Bridges
- ※ Key Laboratory of Transportation Industry for the Control and Circulation Restoration Technology of Transportation Network Facilities in Ecological Security Barrier Area
- ※ The Ministry of Transportation and Communications recognizes the closed-field test base for automatic driving
- ※ Research Base for Field Scientific Observation of Tunnel Meteorology and Structural Mechanics in Cold Areas Transportation Industry
- ※ Building Information Model (BIM) Technology Application Transportation Industry R&D Center
- ※ Road Construction and Maintenance Technology, Materials and Equipment Transportation Industry R&D Center
- ※ Transportation Industry R&D Center for Intelligent Manufacturing Technology of Transportation Infrastructure
- ※ Transportation R&D Center for Automated Driving Technology
- ※ Beidou Satellite Navigation System Technology Application Transportation Industry R&D Center
- ※ R&D Center for New Energy, New Materials, New Equipment in Transportation Industry
- ※ Transportation Automation Technology R&D Center
- ※ R&D Center for Transportation Satellite Technology Applications in Transportation Industry

## Key Laboratories of Ministry of Land and Natural Resources

---

- ※ Key Laboratory of Opening Research of Geotechnical Engineering

- ※ Key Laboratory of Opening Research of Mineralization and Dynamics
- ※ Key Laboratory of Opening Research for Water Resources and Land Environments in Arid and Semi-arid Areas
- ※ Key Laboratory of Magmatic Action Mineralization and Prospecting

## Key Laboratory of Ministry of Housing and Urban-Rural Development

---

- ※ Key Laboratory for Water-supply and Drainage

## Key laboratories of Shaanxi Province and Engineering Research Centers

---

- ※ Key Laboratory of Highway Bridge and Tunnel
- ※ Key Laboratory of New Transportation Energy Exploration and Application & Vehicle Energy Saving
- ※ Key Laboratory of Highway Construction Machinery
- ※ Key Laboratory of Land Remediation
- ※ Key Laboratory of Early Life and Environment
- ※ Research Center of the Intelligent Detection and Equipment Engineering Technology of Road Traffic
- ※ Research Center of Groundwater and Ecological Environment in Shaanxi Province
- ※ Groundwater and Ecological Environment Engineering Research Center
- ※ Engineering Research Center for Digitization of Traffic Infrastructure Construction and Management
- ※ Engineering Research Center of Vehicle Networking and Intelligent Vehicle Testing Technology
- ※ Land Remediation Engineering Technology Research Center
- ※ International Science and Technology Cooperation Base of Telematics and Intelligent Transportation
- ※ International Joint Research Center for Low-Impact Development of Highway Traffic in the Western Region
- ※ International Joint Research Center for Digital Construction and Management of Transportation Infrastructure along the Belt and Road
- ※ International Joint Research Center for Civil Engineering Infrastructure Disaster Prevention
- ※ Key Laboratory of Environmental Conservation in Soil & Water Pollution and Remediation
- ※ Construction Engineering Technology Research Center of Four Bodies and One Union
- ※ Commercial Vehicle Engineering Technology Research Center
- ※ University-Enterprise Joint Research Center of Electric Vehicle Charging and Discharging Technology
- ※ University-Enterprise Joint Research Center for Ecological Environmental Protection and Restoration in the Middle Section of the Yellow River Basin (Coal Mines)
- ※ University-Enterprise Joint Research Center for River and Lake Ecosystem Protection and Restoration
- ※ University-Enterprise Joint Research Center for Intelligent Construction Technology of Bridge Engineering

## Key Research Bases for Humanities and Social Sciences of Shaanxi Province

---

- ※ New Think Tank Alliance for Transportation (governing unit)
- ※ Shaanxi Synergistic Innovation Research Center of Cultural Industry
- ※ Shaanxi Province Key Research Center of Socialist Theory System with Chinese Characteristics
- ※ Research Base of National Security and College Ideology Education
- ※ Popularization Base of Chinese Traditional Culture
- ※ The Base for Popularization of Science and Education of Traffic Power
- ※ Shaanxi Province Public Science and Technology Quality and Public Policy Research Center

## 09 Cooperation and Exchange

Chang'an University owns an international joint laboratory and the Sino-Russian International Technology Transfer Center for Transportation Universities. It has established cooperation relationships with over 180 higher education institutions and research institutions from over 30 countries and regions. The Sino-foreign cooperative educational institution, "Chang'an Dublin International College of Transportation", and the Sino-foreign cooperative educational program, the Joint Bachelor Program of Artificial Intelligence between Chang'an University and École Pour l'Informatique et les Techniques Avancées France, have been approved by the Ministry of Education. Since 1956, the university has trained more than 7,000 international students from 115 countries, and currently has more than 1,700 overseas students. The university actively serves the Belt and Road initiative, promoting the construction of the BRICS Transportation University Alliance, the approval of Chinese Language Center of Maldives Villa College, and the establishment of Nigeria Transportation University. As one of the initiators, the university led and fully participated in the planning, organization and operation of the World Transportation Congress (WTC).

The university has signed strategic cooperation agreements with more than 90 government departments, enterprises and institutions, including the People's Government of Guangxi Zhuang Autonomous Region, Shaanxi Provincial Development and Reform Commission, and China Communications Construction, to promote the continuous development of research cooperation among the government, enterprise and university.

CHD signed a strategic cooperation agreement with the People's Government of Guangxi Zhuang Autonomous Region.

Scholars at home and abroad exchanged ideas.

The Sino-Russian International Technology Transfer Center for Transportation Universities unveiled at Chang'an University.

Chang'an Dublin International College of Transportation at Chang'an University was established.

CHD signed a strategic agreement with China Communications Construction Co., Ltd.

CHD held an international forum on transportation infrastructure engineering standards.

CHD signed a strategic cooperation agreement with Huawei Technology Co., Ltd.

Partner Universities:

180+ Partner Universities around the world

1.Russia	2.Holland	3.France	4.The United Kingdom	5.Ireland	6.Germany	7.Italy
8.Finland	9.Spain	10.Greece	11.Kazakhstan	12.Japan	13.Korea	14.Canada
15.America	16.Australia	17.South Africa	18.Brazil	19.Malaysia	20.India	21.Mongolia

## 10 Campus Life

CHD adheres to the concept of integrating value shaping, ability cultivation, knowledge impartation, and personality development, vigorously implements the "Campus Culture Cohesion Project", with the goal of enriching campus culture and cultivating university spirit. CHD creates high-quality projects of campus culture, and obtains many awards such as "National University Practice Education Innovation and Entrepreneurship Base", "National University Art Education Exemplary Organization", "National Innovation and Entrepreneurship Education Practice Base", forming a profound, open and inclusive university culture with distinctive characteristics.

## 11 Alumni

For more than 70 years, CHD has been characterized by cultivating professional talents in transportation, land resources, urban and rural construction, and has accumulated nearly 300,000 graduates from both domestic and international sources. Its alumni are all over the world, and it is renowned in the industry for its "patriotism, international perspective, innovation ability, and dedication", contributing to national construction and development.

### EXCELLENT ALUMNI

Xu Guanhua  
Former Minister of Ministry of Science and Technology

Feng Zhenglin  
Former Director of the Civil Aviation Administration of China

Ding Han  
Academician of the Chinese Academy of Sciences

Zheng Jianlong  
Academician of the Chinese Academy of Engineering

Li Rui  
Member of the Standing Committee of Guizhou Province, and Secretary of the Zunyi Municipal Committee

Fu Gangfeng  
Chairman and Party Secretary of State Development & Investment Corp., Ltd.

Yang Xingshi  
Chief Accountant of China State Railway Group Co., Ltd.

Liu Zhengkui  
Vice Chairman of the Central Committee of Jiusan Society

## 12 Social Service

For the past 70 years, the scientific research team and outstanding alumni have deeply participated in the construction of major projects such as Shenzhen-Zhongshan Bridge, Hong Kong-Zhuhai-Macao Bridge, Beijing Daxing International Airport, Qinghai-Tibet Highway, and Zhongnanshan Tunnel. They participated in 2020 Everest elevation measurement and scientific research on ground crack prevention and control in projects such as the Xi'an Metro and the Beijing-Shenyang High-speed Railway. The independently developed Beidou/GNSS monitoring system has been transformed into advantageous resources for poverty alleviation through technology and has successfully warned highway disasters and geological landslides multiple times. The innovative achievements have been widely used in the infrastructure construction of countries along the Belt and Road, and actively promote the Chinese industry standards, key technologies and construction concepts to go global.
